

## Suspension Points

Fair or event: \_\_\_\_\_ Hall / Standnr. : \_\_\_\_\_

Requests, complete with detailed plans preferably in DWG or PDF (see page 2 for this order form) of stand position, suspension points, guy ropes/steel wires, measurements and weights of any objects, must be in our possession at least five weeks before the start of the event.

Mansveld Expotech Infra is the only rigging firm that is permitted to make suspension points on the roof of MECC Maastricht. Accordingly, third parties are not permitted to make suspension points. Mansveld Expotech Infra can not guarantee all materials required are in position at the beginning of the 1st day of the build-up.

Up to 21 days before the production of the event starts, you will receive a 25% discount on regular prices. These are the early bird prices. All prices stated are net and exclusive of VAT. These prices are only valid in MECC Maastricht. We will be glad to assist you with the correct riggingplan, complete with all the relevant truss materials, motorized hoists and customized services.

Description	Code	Early-Bird prices	Regular prices	On-site prices	Amount
Steel wire 4mm maximum weight 60kg per point, including ver-lock 4mm & shackle hire (excl. pre-rig)	183850	€ 124,50	€ 156,00	€ 171,50	_____
Suspension point for motor hoist/manual hoist on height (max. 500kg) incl. bridle point and shackle	157300	€ 151,00	€ 188,50	€ 207,00	_____
Hang up and remove motor hoist/manual hoist from a third party per hoist (only in combination with 157300)*	148650	€ 114,50	€ 143,00	€ 157,50	_____
Manual hoist 500kg including 1 suspension point for the entire exhibition period including a 1,5 meter covered steel, 1 metric ton, with shackle (excl. pre-rig)	157600	€ 249,00	€ 311,00	€ 342,50	_____
Surcharge truss structure, including rental, assembly & disassembly (pre-rig)**	225550	€ 31,50	€ 39,00	€ 43,50	_____
Boom lift + wages per hour - 100% - Monday / Friday   08:00h - 24:00h	244400	€ 160,00	€ 200,00	€ 219,00	_____
Boom lift + wages per hour - 150% - Between 00:00h – 08:00h and on Saturday	143850	€ 181,50	€ 227,00	€ 250,00	_____

## Suspension Points

### \*Own Motor hoists

If you decide to use your own motor hoists, you must deliver your own motor hoist to the stand with the chain taken out.

You can order article 148650 only in combination with article 157300. For the record, Mansveld Expotech Infra would like to point out the requirement that motorhoists must be verifiably inspected. (Valid inspection certificates must be produced on request). If you are going to be using electric/powered tackles, the exhibitor/standbuilder will need to ask Exhibitor Services (ES) of MECC Maastricht for a power source. Mansveld Expotech Infra assumes no responsibility in the event that the requisite power supply fails.

Please hand in your requests, complete with detailed plans preferably in DWG or PDF, at least five weeks before the start of Interclassics 2020. Up to 21 days before the production of Interclassics starts, you will receive a 25% discount on the regular prices. These are the early bird prices.

It is important that your request contains details of: stand position, suspension points, guy ropes/steel wires, measurements and weights of any objects to be set up. See the key of symbols below.

On receipt of your application, you will always receive a quotation from Mansveld Expotech Infra which also serves as the order confirmation. When you have signed this quotation and given us your bank details and detailed plans, we will be able to handle your request.

Invoicing is done by MECC Maastricht.

NB : without plans and additional information (see next bulletpoint), we will not be able to handle your request.

### \*\*Truss-structures (pre-rig)

In view of the safety and the building construction of the roof trusses, with the associated load possibilities, there are limitations in MECC Maastricht. The possibilities for suspension points are therefore limited. If additional truss structures (=pre-rig) are to be used, a surcharge will be calculated on top of the mentioned prices. For that reason, always ask us beforehand for a suitable solution with an accompanying quotation, so that you are not confronted with unexpected costs, such as for the usage of extra truss structures (= pre-rig).

 Suspension point for motorhoist 157300 on height	 Steel wire 4 mm	183850	 Electrical cable 230V16Amp	119900
 Chain hoist 500 kg	 Banner steel wire 4 mm	271250	 Electrical cable 400V16Amp	258050

## Suspension Points

### Your request

**1.** Each request should be accompanied by: complete address data for invoicing purposes; name of trade fair; hall and stand number; and a drawing in \*.dwg format (AutoCad) or \*.pdf which accurately reflects the position of the materials to be suspended and the location of the stand in the hall.

**2.** All of the chosen suspension points should be shown on the relevant drawing, including the (height) dimensions in meters, associated weights in kg and preferably at scale of 1:100.

**3.** In regard to the suspension of the supplied items, we assume that they are fitted with the correct, safe suspension and/or fixing means (see also point 10). If we are also required to take care of the assembly/disassembly of the suspended item then we will be happy to make you a suitable offer.

### 3.1 Hanging and removing banners

**A** – Mansveld Expotech Infra will not take the exhibitor's banners into storage. MECC Maastricht's carrier will take care of storage and transport. Therefore contact regarding storage and transport need to be made directly with the carrier of MECC Maastricht. The costs of storage and transport are for the exhibitor.

**B** – The banners supplied by you must be complete and already assembled. A banner is only complete when it is accompanied by a frame and eyelets.

**3.2** All conducting metal constructions (such as lights, wall contact boxes (WKDs), etc.) should be suspended on plasticized steel cables.

### Construction rules

**4.** All materials with a weight in excess of 60 kg must be suspended using at least a hand or motor hoist intended for that purpose.

**5.** Hoists that are supplied and fixed by Mansveld Expotech Infra are fully finished with chain bag. The chain is to be packed up and/ or removed as soon as Mansveld Expotech Infra has the opportunity, depending on the situation in the hall. Mansveld Expotech Infra can decide to begin with the disassembly and/ or removal of the chains at a later point in time due to safety considerations.

**6.** Mansveld Expotech Infra reserves the right not to carry out requests on the grounds of limitations of the roof structure of the hall in which the stand is located and/or for safety reasons.

**7.** Mansveld Expotech Infra assumes no

responsibility for damage or consequential loss arising from incorrect information or treatment of the suspension points by the requestor.

**8.** Mansveld Expotech Infra assumes no responsibility for the suspended construction belonging to third parties or for the work carried out on the structure by the requestor or by third parties. Weights per suspension point or per object communicated to us are binding values and may not be amended without the explicit written permission of Mansveld Expotech Infra.

**9.** Mansveld Expotech Infra shall not be responsible for any damage caused if the weights communicated have been amended without the aforementioned permission. Any damages incurred by us in such a case may be recovered from the client.

**10.** For the rigging materials, the relevant national and international regulations and standards will be applicable. Contrary to industrial safety margin factor of 5, the entertainment industry applies a safety factor of 10. Therefore all standard industrial hoisting equipment should only be loaded to half of the load shown on it (an industrial 500 kg hoist may only be loaded to 250 kg when used in the entertainment industry).

All hoisting equipment must be fitted with a label mark showing a minimum of the following codes: WLL, date of manufacture, testing date or latest date for retesting. Materials that do not meet this requirement, or which show clear signs of damage, must not be used.

**11.** Certain materials may be rejected on safety grounds and this could lead to the immediate suspension of activities on your stand near/next to/under the structure concerned.

**12.** Cherry pickers must only be operated by persons who can demonstrate that they are authorised to do so.

**13.** 4 mm Steel cables are fitted with end ver-locks/fixing ver-locks with a purpose designed lift ver-lock with associated pin in accordance with DIN 15315 (1 type are available: 4 mm) The use of U bolt wire rope clips, so-called steel cable clamps, is not permitted for hoisting equipment. For all other heavier hoisting elements and loads, Mansveld Expotech Infra will provide for each suspension point a 10mm diameter strap/handle with Talurit pressed end joints.

**14.** If you wish to set up the whole rigging yourself, or to have it set up by a third party, Mansveld Expotech Infra is always required

to provide the suspension points you need.

If you choose to do this, you must supply all materials required and assemble/ disassemble yourself within the specified construction and disassembly times.

Work must only be carried out by properly qualified riggers. An accurate drawing of the entirety showing the weight for each point (include calculations) and dimensions in meters at a scale of 1:100 should be submitted for approval, preferably in \*.dwg format (AutoCad) or \*.pdf, at least five weeks prior to the first day of the trade fair/event.

### General Terms and Conditions.

**15.** All quotations, contracts and implementation are subject to the General Conditions of Live Communication & Events B.V. as deposited with the Dutch Chamber of Commerce under number 17250466. A copy of these General Conditions will be sent to you on request, free of charge. Any applicability of the general conditions of the exhibitor is hereby expressly denied.

### Claims

**16.** Claims will only be dealt with by Mansveld Expotech Infra if Mansveld Expotech Infra has received them in writing within 3 days of delivery of the work concerned, and if they contain precise details of the nature and grounds of the complaint.

**17.** If Mansveld Expotech Infra deems the claim to be valid, Mansveld Expotech Infra is still under the obligation to deliver the work agreed, unless Mansveld Expotech Infra shows a preference for crediting.

**18.** Only if, and in as far as, the claim is deemed valid, will the obligation to payment of the amount of the claim be postponed until the claim has been settled.

### Prices

**19.** All prices shown are net and exclusive of 21% VAT. Up to 21 days before the production of the exhibition/event starts, you will receive a 25% discount on the regular prices. These are the early bird prices. Mansveld Expotech Infra reserves the right not to handle requests that are submitted during the construction period.

### Invoicing

**20.** Invoicing is done by MECC Maastricht.
