

NVvP Spring Congress

The Netherlands Psychiatric Association (NVvP) is a membership association of, for and by psychiatrists. Nearly 4,000 psychiatrists and psychiatrist trainees are members of the association.

The purpose of the association is to promote psychiatry in the broadest sense, represent the scientific and professional interests of psychiatrists, foster and encourage education and training, and to promote and monitor the quality of psychiatry.

The NVvP Spring Congress has been held every April at MECC Maastricht since 2012.

'MECC's experience with hosting events is tangible in every aspect of their service.'

Noortje Sax
NVvP Director

Testimonial

'MECC Maastricht is a suitable location thanks to its good conference facilities and the ample space it offers. It's reassuring to know that the MECC has the capacity to comfortably accommodate all our conference participants, allowing the event to run smoothly.'

The MECC team's experience with hosting events is tangible in every aspect of their service. From the time of our initial contact, we had a positive impression of the professional MECC team as well as their partnership with suppliers such as AV partner Houben Souren. A good partnership and the values we share as an organisation with MECC Maastricht and its partners are essential to the success of our congress.'

Additionally, the city of Maastricht is a suitable location with its vibrant atmosphere, rich history, culinary offerings and hospitality, all of which make it a pleasant setting for our spring congress.'
